“(B) SCOPE.—In conducting the reviews under paragraph (1), the head of each agency shall take into account those risk factors that are likely to contribute to a susceptibility to significant improper payments, such as—

“(i) whether the program or activity reviewed is new to the agency;

“(ii) the complexity of the program or activity reviewed;

“(iii) the volume of payments made through the program or activity reviewed;

“(A) internal controls;

“(B) human capital; and

“(C) information systems and other infrastructure;

“(3) if the agency does not have sufficient resources to establish and maintain effective internal controls under paragraph (2)(A), a description of the resources the agency has requested in its budget submission to establish and maintain such internal controls;

Public Law 111–207
111th Congress

An Act

To amend title 46, United States Code, to establish requirements to ensure the security and safety of passengers and crew on cruise vessels, and for other purposes.

July 27, 2010
[H.R. 3360]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) **SHORT TITLE.**—This Act may be cited as the “Cruise Vessel Security and Safety Act of 2010”.

(b) **TABLE OF CONTENTS.**—The table of contents for this Act is as follows:

- Sec. 1. Short title; table of contents.
- Sec. 2. Findings.
- Sec. 3. Cruise vessel security and safety requirements.
- Sec. 4. Offset of administrative costs.
- Sec. 5. Budgetary effects.

SEC. 2. FINDINGS.

The Congress makes the following findings:

(1) There are approximately 200 overnight ocean-going cruise vessels worldwide. The average ocean-going cruise vessel carries 2,000 passengers with a crew of 950 people.

(2) In 2007 alone, approximately 12,000,000 passengers were projected to take a cruise worldwide.

(3) Passengers on cruise vessels have an inadequate appreciation of their potential vulnerability to crime while on ocean voyages, and those who may be victimized lack the information they need to understand their legal rights or to know whom to contact for help in the immediate aftermath of the crime.

(4) Sexual violence, the disappearance of passengers from vessels on the high seas, and other serious crimes have occurred during luxury cruises.

(5) Over the last 5 years, sexual assault and physical assaults on cruise vessels were the leading crimes investigated by the Federal Bureau of Investigation with regard to cruise vessel incidents.

(6) These crimes at sea can involve attacks both by passengers and crewmembers on other passengers and crewmembers.

(7) Except for United States flagged vessels, or foreign flagged vessels operating in an area subject to the direct jurisdiction of the United States, there are no Federal statutes or regulations that explicitly require cruise lines to report alleged crimes to United States Government officials.

(8) It is not known precisely how often crimes occur on cruise vessels or exactly how many people have disappeared

Safety Act of
2010.

during ocean voyages because cruise line companies do not make comprehensive, crime-related data readily available to the public.

(9) Obtaining reliable crime-related cruise data from governmental sources can be difficult, because multiple countries may be involved when a crime occurs on the high seas, including the flag country for the vessel, the country of citizenship of particular passengers, and any countries having special or maritime jurisdiction.

(10) It can be difficult for professional crime investigators to immediately secure an alleged crime scene on a cruise vessel, recover evidence of an onboard offense, and identify or interview potential witnesses to the alleged crime.

(11) Most cruise vessels that operate into and out of United States ports are registered under the laws of another country, and investigations and prosecutions of crimes against passengers and crewmembers may involve the laws and authorities of multiple nations.

(12) The Department of Homeland Security has found it necessary to establish 500-yard security zones around cruise vessels to limit the risk of terrorist attack. Recently piracy has dramatically increased throughout the world.

(13) To enhance the safety of cruise passengers, the owners of cruise vessels could upgrade, modernize, and retrofit the safety and security infrastructure on such vessels by installing peep holes in passenger room doors, installing security video cameras in targeted areas, limiting access to passenger rooms to select staff during specific times, and installing acoustic hailing and warning devices capable of communicating over distances.

SEC. 3. CRUISE VESSEL SECURITY AND SAFETY REQUIREMENTS.

(a) IN GENERAL.—Chapter 35 of title 46, United States Code, is amended by adding at the end the following:

(B) tribal justice systems are often the most appropriate institutions for maintaining law and order in Indian country;

(3) less than 3,000 tribal and Federal law enforcement officers patrol more than 56,000,000 acres of Indian country, which reflects less than ½ of the law enforcement presence in comparable rural communities nationwide;

(4) the complicated jurisdictional scheme that exists in Indian country—

(B) 34 percent of American Indian and Alaska Native women will be raped in their lifetimes; and

(C) 39 percent of American Indian and Alaska Native women will be subject to domestic violence;

(6) Indian tribes have faced significant increases in instances of domestic violence, burglary, assault, and child abuse as a direct result of increased methamphetamine use on Indian reservations; and

(7) crime data is a fundamental tool of law enforcement, but for decades the Bureau of Indian Affairs and the Department of Justice have not been able to coordinate or consistently report crime and prosecution rates in tribal communities.

(b) PURPOSES.—The purposes of this title are—

(1) to clarify the responsibilities of Federal, State, tribal, and local governments with respect to crimes committed in Indian country;

(2) to increase coordination and communication among Federal, State, tribal, and local law enforcement agencies;

(3) to empower tribal governments with the authority, resources, and information necessary to safely and effectively provide public safety in Indian country;

(4) to reduce the prevalence of violent crime in Indian country and to combat sexual and domestic violence against American Indian and Alaska Native women;

(5) to prevent drug trafficking and reduce rates of alcohol and drug addiction in Indian country; and

(6) to increase and standardize the collection of criminal data and the sharing of criminal history information among Federal, State, and tribal officials responsible for responding to and investigating crimes in Indian country.

28 USC 1 note.

28 USC 4101
note.

To amend title 28, United States Code, to prohibit recognition and enforcement of foreign defamation judgments and certain foreign judgments against the providers of interactive computer services.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Securing the Protection of our Enduring and Established Constitutional Heritage Act” or the “SPEECH Act”.

SEC. 2. FINDINGS.

Congress finds the following:

(1) The freedom of speech and the press is enshrined in the first amendment to the Constitution, and is necessary to promote the vigorous dialogue necessary to shape public policy in a representative democracy.

(2) Some persons are obstructing the free expression rights of United States authors and publishers, and in turn chilling the first amendment to the Constitution of the United States interest of the citizenry in receiving information on matters of importance, by seeking out foreign jurisdictions that do not provide the full extent of free-speech protections to authors and publishers that are available in the United States, and suing a United States author or publisher in that foreign jurisdiction.

(3) These foreign defamation lawsuits not only suppress the free speech rights of the defendants to the suit, but inhibit other written speech that might otherwise have been written or published but for the fear of a foreign lawsuit.

(4) The threat of the libel laws of some foreign countries is so dramatic that the United Nations Human Rights Committee examined the issue and indicated that in some instances the law of libel has served to discourage critical media reporting on matters of serious public interest, adversely affecting the ability of scholars and journalists to publish their work. The advent of the internet and the international distribution of foreign media also create the danger that one country’s unduly restrictive libel law will affect freedom of expression worldwide on matters of valid public interest.

(5) Governments and courts of foreign countries scattered around the world have failed to curtail this practice of permitting libel lawsuits against United States persons within their

courts, and foreign libel judgments inconsistent with United States first amendment protections are increasingly common.

SEC. 3. RECOGNITION OF FOREIGN DEFAMATION JUDGMENTS.

(a) **IN GENERAL.**—Part VI of title 28, United States Code, is amended by adding at the end the following:

“CHAPTER 181—FOREIGN JUDGMENTS

“Sec.

“4101. Definitions.

“4102. Recognition of foreign defamation judgments.

“4103. Removal.

“4104. Declaratory judgments.

“4105. Attorney’s fees.

“§ 4101. Definitions

“In this chapter:

“(1) **DEFAMATION.**—The term ‘defamation’ means any action or other proceeding for defamation, libel, slander, or similar claim alleging that forms of speech are false, have caused damage to reputation or emotional distress, have presented any person in a false light, or have resulted in criticism, dishonor, or condemnation of any person.

“(2) **DOMESTIC COURT.**—The term ‘domestic court’ means a Federal court or a court of any State.

“(3) **FOREIGN COURT.**—The term ‘foreign court’ means a court, administrative body, or other tribunal of a foreign country.

“(4) **FOREIGN JUDGMENT.**—The term ‘foreign judgment’ means a final judgment rendered by a foreign court.

“(5) **STATE.**—The term ‘State’ means each of the several States, the District of Columbia, and any commonwealth, territory, or possession of the United States.

“(6) **UNITED STATES PERSON.**—The term ‘United States person’ means—

“(B) an alien lawfully admitted for permanent residence to the United States;

“(C) an alien lawfully residing in the United States at the time that the speech that is the subject of the foreign defamation action was researched, prepared, or disseminated; or

“(D) a business entity incorporated in, or with its primary location or place of operation in, the United States.

“§ 4102. Recognition of foreign defamation judgments

“(a) **FIRST AMENDMENT CONSIDERATIONS.**—

“(1) **IN GENERAL.**—Notwithstanding any other provision of Federal or State law, a domestic court shall not recognize or enforce a foreign judgment for defamation unless the domestic court determines that—

“(A) the defamation law applied in the foreign court’s adjudication provided at least as much protection for freedom of speech and press in that case as would be provided by the first amendment to the Constitution of the United States and by the constitution and law of the State in which the domestic court is located; or

“(B) even if the defamation law applied in the foreign court’s adjudication did not provide as much protection for freedom of speech and press as the first amendment to the Constitution of the United States and the constitution and law of the State, the party opposing recognition or enforcement of that foreign judgment would have been found liable for defamation by a domestic court applying the first amendment to the Constitution of the United States and the constitution and law of the State in which the domestic court is located.

“(2) BURDEN OF ESTABLISHING APPLICATION OF DEFAMATION LAWS.—The party seeking recognition or enforcement of the foreign judgment shall bear the burden of making the showings required under subparagraph (A) or (B).

“(b) JURISDICTIONAL CONSIDERATIONS.—

“(1) IN GENERAL.—Notwithstanding any other provision of Federal or State law, a domestic court shall not recognize or enforce a foreign judgment for defamation unless the domestic court determines that the exercise of personal jurisdiction by the foreign court comported with the due process requirements that are imposed on domestic courts by the Constitution of the United States.

“(2) BURDEN OF ESTABLISHING EXERCISE OF JURISDICTION.—The party seeking recognition or enforcement of the foreign judgment shall bear the burden of making the showing that the foreign court’s exercise of personal jurisdiction comported with the due process requirements that are imposed on domestic courts by the Constitution of the United States.

“(c) JUDGMENT AGAINST PROVIDER OF INTERACTIVE COMPUTER SERVICE.—

“(1) IN GENERAL.—Notwithstanding any other provision of Federal or State law, a domestic court shall not recognize or enforce a foreign judgment for defamation against the provider of an interactive computer service, as defined in section 230 of the Communications Act of 1934 (47 U.S.C. 230) unless the domestic court determines that the judgment would be consistent with section 230 if the information that is the subject of such judgment had been provided in the United States.

“(2) BURDEN OF ESTABLISHING CONSISTENCY OF JUDGMENT.—The party seeking recognition or enforcement of the foreign judgment shall bear the burden of establishing that the judgment is consistent with section 230.

“(d) APPEARANCES NOT A BAR.—An appearance by a party in a foreign court rendering a foreign judgment to which this section applies shall not deprive such party of the right to oppose the recognition or enforcement of the judgment under this section, or represent a waiver of any jurisdictional claims.

“(e) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to—

“(1) affect the enforceability of any foreign judgment other than a foreign judgment for defamation; or

“(2) limit the applicability of section 230 of the Communications Act of 1934 (47 U.S.C. 230) to causes of action for defamation.

“§ 4103. Removal

“In addition to removal allowed under section 1441, any action brought in a State domestic court to enforce a foreign judgment for defamation in which—

“(1) any plaintiff is a citizen of a State different from any defendant;

“(2) any plaintiff is a foreign state or a citizen or subject of a foreign state and any defendant is a citizen of a State; or

“(3) any plaintiff is a citizen of a State and any defendant is a foreign state or citizen or subject of a foreign state, may be removed by any defendant to the district court of the United States for the district and division embracing the place where such action is pending without regard to the amount in controversy between the parties.

“§ 4104. Declaratory judgments

“(a) CAUSE OF ACTION.—

“(1) IN GENERAL.—Any United States person against whom a foreign judgment is entered on the basis of the content of any writing, utterance, or other speech by that person that has been published, may bring an action in district court, under section 2201(a), for a declaration that the foreign judgment is repugnant to the Constitution or laws of the United States. For the purposes of this paragraph, a judgment is repugnant to the Constitution or laws of the United States if it would not be enforceable under section 4102 (a), (b), or (c).

“(2) BURDEN OF ESTABLISHING UNENFORCEABILITY OF JUDGMENT.—The party bringing an action under paragraph (1) shall bear the burden of establishing that the foreign judgment would not be enforceable under section 4102 (a), (b), or (c).

“(b) NATIONWIDE SERVICE OF PROCESS.—Where an action under this section is brought in a district court of the United States, process may be served in the judicial district where the case is brought or any other judicial district of the United States where the defendant may be found, resides, has an agent, or transacts business.

“§ 4105. Attorneys’ fees

“In any action brought in a domestic court to enforce a foreign judgment for defamation, including any such action removed from State court to Federal court, the domestic court shall, absent exceptional circumstances, allow the party opposing recognition or enforcement of the judgment a reasonable attorney’s fee if such party prevails in the action on a ground specified in section 4102 (a), (b), or (c).”

(b) SENSE OF CONGRESS.—It is the Sense of the Congress that for the purpose of pleading a cause of action for a declaratory judgment, a foreign judgment for defamation or any similar offense as described under chapter 181 of title 28, United States Code, (as added by this Act) shall constitute a case of actual controversy under section 2201(a) of title 28, United States Code.

This Act may be cited as the “Star-Spangled Banner Commemorative Coin Act”.

SEC. 2. FINDINGS.

The Congress finds as follows:

(1) During the Battle for Baltimore of the War of 1812, Francis Scott Key visited the British fleet in the Chesapeake Bay on September 7, 1814, to secure the release of Dr. William Beanes, who had been captured after the British burned Washington, DC.

(2) The release of Dr. Beanes was secured, but Key and Beanes were held by the British during the shelling of Fort McHenry, one of the forts defending Baltimore.

(3) On the morning of September 14, 1814, after the 25-hour British bombardment of Fort McHenry, Key peered through the clearing smoke to see a 42-foot by 30-foot American flag flying proudly atop the Fort.

(4) He was so inspired to see the enormous flag still flying over the Fort that he began penning a song, which he named *The Defence of Fort McHenry*, to commemorate the occasion and he included a note that it should be sung to the tune of the popular British melody *To Anacreon in Heaven*.

(5) In 1916, President Woodrow Wilson ordered that the anthem, which had been popularly renamed the *Star-Spangled Banner*, be played at military and naval occasions.

(6) On March 3, 1931, President Herbert Hoover signed a resolution of Congress that officially designated the *Star-Spangled Banner* as the National Anthem of the United States.

An Act

To award a congressional gold medal to Dr. Muhammad Yunus, in recognition of his contributions to the fight against global poverty.

Oct. 5, 2010
[S. 846]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

31 USC 5111
note.

SECTION 1. FINDINGS.

The Congress finds that—

(1) Dr. Muhammad Yunus is recognized in the United States and throughout the world as a leading figure in the fight against poverty and the effort to promote economic and social change;

(2) Muhammad Yunus is the recognized developer of the concept of microcredit, and Grameen Bank, which he founded, has created a model of lending that has been emulated across the globe;

(3) Muhammad Yunus launched this global movement to create economic and social development from below, beginning in 1976, with a loan of \$27 from his own pocket to 42 crafts persons in a small village in Bangladesh;

(4) Muhammad Yunus has demonstrated the life-changing potential of extending very small loans (at competitive interest rates) to the very poor and the economic feasibility of microcredit and other microfinance and microenterprise practices and services;

(5) Dr. Yunus's work has had a particularly strong impact on improving the economic prospects of women, and on their families, as over 95 percent of microcredit borrowers are women;

(6) Dr. Yunus has pioneered a movement with the potential to assist a significant number of the more than 1,400,000,000 people, mostly women and children, who live on less than \$1.25 a day, and the 2,600,000,000 people who live on less than \$2 a day, and which has already reached 155,000,000, by one estimate;

(7) there are now an estimated 24,000,000 microenterprises in the United States accounting for approximately 18 percent of private (nonfarm) employment and 87 percent of all business in the United States, and the Small Business Administration has made over \$318,000,000 in microloans to entrepreneurs since 1992;

(8) Dr. Yunus, along with the Grameen Bank, was awarded the Nobel Peace Prize in 2006 for his efforts to promote economic and social opportunity and out of recognition that lasting peace cannot be achieved unless large population groups find the means, such as microcredit, to break out of poverty; and

(9) the microcredit ideas developed and put into practice by Muhammad Yunus, along with other bold initiatives, can make a historical breakthrough in the fight against poverty.

SEC. 2. CONGRESSIONAL GOLD MEDAL.

(a) **PRESENTATION AUTHORIZED.**—The Speaker of the House of Representatives and the President pro tempore of the Senate shall make appropriate arrangements for the presentation, on behalf of the Congress, of a gold medal of appropriate design to Dr. Muhammad Yunus, in recognition of his many enduring contributions to the fight against global poverty.

(b) **DESIGN AND STRIKING.**—For purposes of the presentation referred to in subsection (a), the Secretary of the Treasury (hereafter in this Act referred to as the “Secretary”) shall strike a gold medal with suitable emblems, devices, and inscriptions, to be determined by the Secretary.

The Secretary may strike and sell duplicates in bronze of the gold medal struck pursuant to section 2, under such regulations as the Secretary may prescribe, at a price sufficient to cover the cost thereof, including labor, materials, dies, use of machinery, and overhead expenses, and the cost of the gold medal.

An Act

To grant the congressional gold medal, collectively, to the 100th Infantry Battalion and the 442nd Regimental Combat Team, United States Army, in recognition of their dedicated service during World War II.

Oct. 5, 2010
[S. 1055]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

31 USC 5111
note.

SECTION 1. FINDINGS.

Congress makes the following findings:

(1) On January 19, 1942, 6 weeks after the December 7, 1941, attack on Pearl Harbor by the Japanese Navy, the United States Army discharged all Japanese-Americans in the Reserve Officers Training Corps and changed their draft status to “4C”—the status of “enemy alien” which is ineligible for the draft.

(2) On January 23, 1942, Japanese-Americans in the military on the mainland were segregated out of their units.

(3) Further, on May 3, 1942, General John L. DeWitt issued Civilian Exclusion Order No. 346, ordering all people of Japanese ancestry, whether citizens or noncitizens, to report to assembly centers, where they would live until being moved to permanent relocation centers.

(4) On June 5, 1942, 1,432 predominantly Nisei (second generation Americans of Japanese ancestry) members of the Hawaii Provisional Infantry Battalion were shipped from the Hawaiian Islands to Oakland, CA, where the 100th Infantry Battalion was activated on June 12, 1942, and then shipped to train at Camp McCoy, Wisconsin.

(5) The excellent training record of the 100th Infantry Battalion and petitions from prominent civilian and military personnel helped convince President Roosevelt and the War Department to reopen military service to Nisei volunteers who were incorporated into the 442nd Regimental Combat Team after it was activated in February of 1943.

(6) In that same month, the 100th Infantry Battalion was transferred to Camp Shelby, Mississippi, where it continued to train, and even though the battalion was ready to deploy shortly thereafter, the battalion was refused by General Eisenhower, due to concerns over the loyalty and patriotism of the Nisei.

(7) The 442nd Regimental Combat Team later trained with the 100th Infantry Battalion at Camp Shelby in May of 1943.

(8) Eventually, the 100th Infantry Battalion was deployed to the Mediterranean and entered combat in Italy on September 26, 1943.

(9) Due to their bravery and valor, members of the Battalion were honored with 6 awards of the Distinguished Service Cross in the first 8 weeks of combat.

(10) The 100th Battalion fought at Cassino, Italy in January 1944, and later accompanied the 34th Infantry Division to Anzio, Italy.

(11) The 442nd Regimental Combat Team arrived in Civitavecchia, Italy on June 7, 1944, and on June 15 of the following week, the 100th Infantry Battalion was formally made an integral part of the 442nd Regimental Combat Team, and fought for the last 11 months of the war with distinction in Italy, southern France, and Germany.

(12) The battalion was awarded the Presidential Unit Citation for its actions in battle on June 26–27, 1944.

(13) The 442nd Regimental became the most decorated unit in United States military history for its size and length of service.

(14) The 100th Battalion and the 442nd Regimental Combat Team, received 7 Presidential Unit Citations, 21 Medals of Honor, 29 Distinguished Service Crosses, 560 Silver Stars, 4,000 Bronze Stars, 22 Legion of Merit Medals, 15 Soldier's Medals, and over 4,000 Purple Hearts, among numerous additional distinctions.

(15) The United States remains forever indebted to the bravery, valor, and dedication to country these men faced while fighting a 2-fronted battle of discrimination at home and fascism abroad.

(16) Their commitment and sacrifice demonstrates a highly uncommon and commendable sense of patriotism and honor.

(17) The Military Intelligence Service (in this Act referred to as the "MIS") was made up of about 6,000 Japanese American soldiers who conducted highly classified intelligence operations that proved to be vital to United States military successes in the Pacific Theatre.

(18) As they were discharged from the Army, MIS soldiers were told not to discuss their wartime work, due to its sensitive nature, and their contributions were not known until passage of the Freedom of Information Act in 1974.

(19) MIS soldiers were attached individually or in small groups to United States and Allied combat units, where they intercepted radio transmissions, translated enemy documents, interrogated enemy prisoners of war, volunteered for reconnaissance and covert intelligence missions, and persuaded enemy combatants to surrender.

(20) Their contributions continued during the Allied post-war occupation of Japan, and MIS linguistic skills and understanding of Japanese customs were invaluable to occupation forces as they assisted Japan in a peaceful transition to a new, democratic form of government.

SEC. 2. CONGRESSIONAL GOLD MEDAL.

(a) AWARD AUTHORIZED.—The Speaker of the House of Representatives and the President pro tempore of the Senate shall make appropriate arrangements for the award, on behalf of the Congress, of a single gold medal of appropriate design to the 100th Infantry Battalion, the 442nd Regimental Combat Team, and the

Military Intelligence Service, United States Army, collectively, in recognition of their dedicated service during World War II.

(b) **DESIGN AND STRIKING.**—For the purposes of the award referred to in subsection (a), the Secretary of the Treasury (hereafter in this Act referred to as the “Secretary”) shall strike the gold medal with suitable emblems, devices, and inscriptions, to be determined by the Secretary.

(c) **SMITHSONIAN INSTITUTION.**—

(1) **IN GENERAL.**—Following the award of the gold medal in honor of the 100th Infantry Battalion, the 442nd Regimental Combat Team, and the Military Intelligence Service, United States Army, under subsection (a), the gold medal shall be given to the Smithsonian Institution, where it will be displayed as appropriate and made available for research.

(2) **SENSE OF CONGRESS.**—It is the sense of the Congress that the Smithsonian Institution should make the gold medal received under paragraph (1) available for display elsewhere, particularly at other appropriate locations associated with the 100th Infantry Battalion, the 442nd Regimental Combat Team, and the Military Intelligence Service, United States Army.

SEC. 3. DUPLICATE MEDALS.

The Secretary may strike and sell duplicates in bronze of the gold medal struck under section 2, at a price sufficient to cover the costs of the medals, including labor, materials, dies, use of machinery, and overhead expenses.

SEC. 4. NATIONAL MEDALS.

Medals struck pursuant to this Act are national medals for purposes of chapter 51 of title 31, United States Code.

SEC. 5. AUTHORITY TO USE FUNDS; PROCEEDS OF SALE.

(a) **AUTHORITY TO USE FUNDS.**—There is authorized to be charged against the United States Mint Public Enterprise Fund, an amount not to exceed \$30,000 to pay for the cost of the medal authorized under section 2.

(b) **PROCEEDS OF SALE.**—Amounts received from the sale of duplicate bronze medals under section 3 shall be deposited in the United States Mint Public Enterprise Fund.

Public Law 111–0255
111th Congress

An Act

Oct. 5, 2010
[S. 1674]

To provide for an exclusion under the Supplemental Security Income program and the Medicaid program for compensation provided to individuals who participate in clinical trials for rare diseases or conditions.

Improving Access
to Clinical Trials
Act of 2009.
42 USC 1305
note.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Improving Access to Clinical Trials Act of 2009”.

42 USC 1382a
note.

SEC. 2. FINDINGS.

Congress finds the following:

(1) Advances in medicine depend on clinical trial research conducted at public and private research institutions across the United States.

(2) The challenges associated with enrolling participants in clinical research studies are especially difficult for studies that evaluate treatments for rare diseases and conditions (defined by the Orphan Drug Act as a disease or condition affecting fewer than 200,000 Americans), where the available number of willing and able research participants may be very small.

(3) In accordance with ethical standards established by the National Institutes of Health, sponsors of clinical research may provide payments to trial participants for out-of-pocket costs associated with trial enrollment and for the time and commitment demanded by those who participate in a study. When offering compensation, clinical trial sponsors are required to provide such payments to all participants.

(4) The offer of payment for research participation may pose a barrier to trial enrollment when such payments threaten the eligibility of clinical trial participants for Supplemental Security Income and Medicaid benefits.

(5) With a small number of potential trial participants and the possible loss of Supplemental Security Income and Medicaid benefits for many who wish to participate, clinical trial research for rare diseases and conditions becomes exceptionally difficult and may hinder research on new treatments and potential cures for these rare diseases and conditions.

SEC. 3. EXCLUSION FOR COMPENSATION FOR PARTICIPATION IN CLINICAL TRIALS FOR RARE DISEASES OR CONDITIONS.

(a) **EXCLUSION FROM INCOME.**—Section 1612(b) of the Social Security Act (42 U.S.C. 1382a(b)) is amended—

An Act

[H.R. 553]

To require the Secretary of Homeland Security to develop a strategy to prevent the over-classification of homeland security and other information and to promote the sharing of unclassified homeland security and other information, and for other purposes.

Reducing Over-
Classification
Act.
6 USC 101 note.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Reducing Over-Classification Act”.

6 USC 124m
note.

SEC. 2. FINDINGS.

Congress finds the following:

(1) The National Commission on Terrorist Attacks Upon the United States (commonly known as the “9/11 Commission”) concluded that security requirements nurture over-classification and excessive compartmentation of information among agencies.

(2) The 9/11 Commission and others have observed that the over-classification of information interferes with accurate, actionable, and timely information sharing, increases the cost of information security, and needlessly limits stakeholder and public access to information.

(3) Over-classification of information causes considerable confusion regarding what information may be shared with whom, and negatively affects the dissemination of information within the Federal Government and with State, local, and tribal entities, and with the private sector.

(4) Over-classification of information is antithetical to the creation and operation of the information sharing environment established under section 1016 of the Intelligence Reform and Terrorism Prevention Act of 2004 (6 U.S.C. 485).

(5) Federal departments or agencies authorized to make original classification decisions or that perform derivative classification of information are responsible for developing, implementing, and administering policies, procedures, and programs that promote compliance with applicable laws, executive orders, and other authorities pertaining to the proper use of classification markings and the policies of the National Archives and Records Administration.

50 USC 435d
note.

SEC. 3. DEFINITIONS.

In this Act:

(1) DERIVATIVE CLASSIFICATION AND ORIGINAL CLASSIFICATION.—The terms “derivative classification” and “original classification” have the meanings given those terms in Executive Order No. 13526.

(2) EXECUTIVE AGENCY.—The term “Executive agency” has the meaning given that term in section 105 of title 5, United States Code.

SEC. 2. FINDINGS.

42 USC 18301.

Congress makes the following findings:

(1) The United States human space flight program has, since the first Mercury flight on May 5, 1961, been a source of pride and inspiration for the Nation.

(2) The establishment of and commitment to human exploration goals is essential for providing the necessary long term focus and programmatic consistency and robustness of the United States civilian space program.

(3) The National Aeronautics and Space Administration is and should remain a multi-mission agency with a balanced and robust set of core missions in science, aeronautics, and human space flight and exploration.

(4) In the 50 years since the establishment of NASA, the arena of space has evolved substantially. As the uses and users of space continue to expand, the issues and operations in the regions closest to Earth have become increasingly complex, with a growing number of overlaps between civil, commercial and national security activities. These developments present opportunities and challenges to the space activities of NASA and the United States.

(5) The extraordinary challenges of achieving access to space both motivated and accelerated the development of technologies and industrial capabilities that have had widespread applications which have contributed to the technological excellence of the United States. It is essential to tie space activity to human challenges ranging from enhancing the influence, relationships, security, economic development, and commerce of the United States to improving the overall human condition.

(6) It is essential to the economic well-being of the United States that the aerospace industrial capacity, highly skilled workforce, and embedded expertise remain engaged in demanding, challenging, and exciting efforts that ensure United States leadership in space exploration and related activities.

(7) Crewmembers provide the essential component to ensure the return on investment from and the growth and safe operation of the ISS. The Russian Soyuz vehicle has allowed continued human presence on the ISS for United States crewmembers with its ability to serve as both a routine and backup capability for crew delivery, rescue, and return. With the impending retirement of the Space Shuttle, the United States will find itself with no national crew delivery and return system. Without any other system, the United States and all the ISS partners will have no redundant system for human access to and from the ISS. It is therefore essential that a United States capability be developed as soon as possible.

(8) Existing and emerging United States commercial launch capabilities and emerging launch capabilities offer the potential for providing crew support assets. New capabilities for human crew access to the ISS should be developed in a manner that ensures ISS mission assurance and safety. Commercial services

offer the potential to broaden the availability and access to space at lower costs.

(9) While commercial transportation systems have the promise to contribute valuable services, it is in the United States national interest to maintain a government operated space transportation system for crew and cargo delivery to space.

(10) Congress restates its commitment, expressed in the National Aeronautics and Space Administration Authorization Act of 2005 (Public Law 109–155) and the National Aeronautics and Space Administration Authorization Act of 2008 (Public Law 110–422), to the development of commercially developed launch and delivery systems to the ISS for crew and cargo missions. Congress reaffirms that NASA shall make use of United States commercially provided ISS crew transfer and crew rescue services to the maximum extent practicable.

(11) It is critical to identify an appropriate combination of NASA and related United States Government programs, while providing a framework that allows partnering, leveraging and stimulation of the existing and emerging commercial and international efforts in both near Earth space and the regions beyond.

(12) The designation of the United States segment of the ISS as a National Laboratory, as provided by the National Aeronautics and Space Administration Authorization Act of 2005 and the National Aeronautics and Space Administration Authorization Act of 2008, provides an opportunity for multiple United States Government agencies, university-based researchers, research organizations, and others to utilize the unique environment of microgravity for fundamental scientific research and potential economic development.

(13) For some potential replacement elements necessary for ISS sustainability, the Space Shuttle may represent the only vehicle, existing or planned, capable of carrying those elements to the ISS in the near term. Additional or alternative transportation capabilities must be identified as contingency delivery options, and accompanied by an independent analysis of projected availability of such capabilities.

(14) The United States must develop, as rapidly as possible, replacement vehicles capable of providing both human and cargo launch capability to low-Earth orbit and to destinations beyond low-Earth orbit.

(15) There is a need for national space and export control policies that protect the national security of the United States while also enabling the United States and its aerospace industry to undertake cooperative programs in science and human space flight in an effective and efficient manner and to compete effectively in the global market place.

42 USC 18311.

(a) **USE OF NON-UNITED STATES HUMAN SPACE FLIGHT TRANSPORTATION CAPABILITIES.**—It is the policy of the United States that reliance upon and use of non-United States human space flight capabilities shall be undertaken only as a contingency in circumstances where no United States-owned and operated human space flight capability is available, operational, and certified for flight by appropriate Federal agencies.

(b) **UNITED STATES HUMAN SPACE FLIGHT CAPABILITIES.**—Congress reaffirms the policy stated in section 501(a) of the National

Aeronautics and Space Administration Authorization Act of 2005 (42 U.S.C. 16761(a)), that the United States shall maintain an uninterrupted capability for human space flight and operations in low-Earth orbit, and beyond, as an essential instrument of national security and of the capacity to ensure continued United States participation and leadership in the exploration and utilization of space.

42 USC 18312.

SEC. 202. GOALS AND OBJECTIVES.

(a) **LONG TERM GOAL.**—The long term goal of the human space flight and exploration efforts of NASA shall be to expand permanent human presence beyond low-Earth orbit and to do so, where practical, in a manner involving international partners.

(b) **KEY OBJECTIVES.**—The key objectives of the United States for human expansion into space shall be—

(1) to sustain the capability for long-duration presence in low-Earth orbit, initially through continuation of the ISS and full utilization of the United States segment of the ISS as a National Laboratory, and through assisting and enabling an expanded commercial presence in, and access to, low-Earth orbit, as elements of a low-Earth orbit infrastructure;

(2) to determine if humans can live in an extended manner in space with decreasing reliance on Earth, starting with utilization of low-Earth orbit infrastructure, to identify potential roles that space resources such as energy and materials may play, to meet national and global needs and challenges, such as potential cataclysmic threats, and to explore the viability of and lay the foundation for sustainable economic activities in space;

(3) to maximize the role that human exploration of space can play in advancing overall knowledge of the universe, supporting United States national and economic security and the United States global competitive posture, and inspiring young people in their educational pursuits; and

(4) to build upon the cooperative and mutually beneficial framework established by the ISS partnership agreements and experience in developing and undertaking programs and meeting objectives designed to realize the goal of human space flight set forth in subsection (a).

42 USC 18313.

SEC. 203. ASSURANCE OF CORE CAPABILITIES.

(a) **SENSE OF CONGRESS.**—It is the sense of Congress that—

(1) the ISS, technology developments, the current Space Shuttle program, and follow-on transportation systems authorized by this Act form the foundation of initial capabilities for missions beyond low-Earth orbit to a variety of lunar and Lagrangian orbital locations; and

(2) these initial missions and related capabilities should be utilized to provide operational experience, technology development, and the placement and assured use of in-space infrastructure and in-space servicing of existing and future assets.

(b) **SPACE SHUTTLE CAPABILITY ASSURANCE.**—

(1) **DEVELOPMENT OF FOLLOW-ON SPACE TRANSPORTATION SYSTEMS.**—The Administrator shall proceed with the development of follow-on space transportation systems in a manner that ensures that the national capability to restart and fly Space Shuttle missions can be initiated if required by the

Congress, in an Act enacted after the date of enactment of this Act, or by a Presidential determination transmitted to the Congress, before the last Space Shuttle mission authorized by this Act is completed.

(2) **REQUIRED ACTIONS.**—In carrying out the requirement in paragraph (1), the Administrator shall authorize refurbishment of the manufactured external tank of the Space Shuttle, designated as ET–94, and take all actions necessary to enable its readiness for use in the Space Launch System development as a critical skills and capability retention effort or for test purposes, while preserving the ability to use this tank if needed for an ISS contingency if deemed necessary under paragraph (1).

SEC. 204. INDEPENDENT STUDY ON HUMAN EXPLORATION OF SPACE.

42 USC 18321.

(a) **FINDINGS.**—Congress makes the following findings:

(1) The extension of the human presence from low-Earth orbit to other regions of space beyond low-Earth orbit will enable missions to the surface of the Moon and missions to deep space destinations such as near-Earth asteroids and Mars.

(2) The regions of cis-lunar space are accessible to other national and commercial launch capabilities, and such access raises a host of national security concerns and economic

implications that international human space endeavors can help to address.

(3) The ability to support human missions in regions beyond low-Earth orbit and on the surface of the Moon can also drive developments in emerging areas of space infrastructure and technology.

(4) Developments in space infrastructure and technology can stimulate and enable increased space applications, such as in-space servicing, propellant resupply and transfer, and in situ resource utilization, and open opportunities for additional users of space, whether national, commercial, or international.

(5) A long term objective for human exploration of space should be the eventual international exploration of Mars.

(6) Future international missions beyond low-Earth orbit should be designed to incorporate capability development and availability, affordability, and international contributions.

(7) Human space flight and future exploration beyond low-Earth orbit should be based around a pay-as-you-go approach. Requirements in new launch and crew systems authorized in this Act should be scaled to the minimum necessary to meet the core national mission capability needed to conduct cis-lunar missions. These initial missions, along with the development of new technologies and in-space capabilities can form the foundation for missions to other destinations. These initial missions also should provide operational experience prior to the further human expansion into space.

international posture of the United States. Additionally, recognizing the number of relevant participants and activities involved with Earth observations within the United States Government and internationally, Congress supports the strengthening of collaboration across these areas;

(2) NASA plays a critical role through its ability to provide data on solar output, sea level rise, atmospheric and ocean temperature, ozone depletion, air pollution, and observation of human and environment relationships;

(3) programs should utilize open standards consistent with international data-sharing principles and obtain and convert data from other government agencies, including data from the United States Geological Survey, and data derived from satellites operated by NOAA as well as from international satellites are important to the study of climate science and such cooperative relationships and programs should be maintained;

(4) Earth-observing satellites and sustained monitoring programs will continue to play a vital role in climate science, environmental understanding, mitigation of destructive environmental impacts, and contributing to the general national welfare; and

(5) land remote sensing observation plays a critical role in Earth science, and the national space policy supports this role by requiring operational land remote sensing capabilities.

42 USC 18371.

SEC. 702. INTERAGENCY COLLABORATION IMPLEMENTATION APPROACH.

(a) FINDINGS.—The Congress finds the following:

(1) The United States has led the world in the scientific exploration of space for nearly 50 years.

(2) Missions such as Viking, Voyager, Cassini, and New Horizons have greatly expanded knowledge of our solar system and planetary characteristics and evolution.

(3) Radioisotope power systems are the only available power sources for deep space missions making it possible to travel to such distant destinations as Mars, Jupiter, Saturn, Pluto, and beyond and maintain operational control and systems viability for extended mission durations.

(4) Current radioisotope power systems supplies and production will not fully support NASA missions planned even in the next decade and, without a new domestic production capability, the United States will no longer have the means to explore the majority of the solar system by the end of this decade.

(5) Continuing to rely on Russia or other foreign sources for radioisotope power system fuel production is not a secure option.

(6) Reestablishing domestic production will require a long lead-time. Thus, meeting future space exploration mission needs requires that a restart project begin at the earliest opportunity.

(b) IN GENERAL.—The Administrator shall, in coordination with the Secretary of Energy, pursue a joint approach beginning in fiscal year 2011 towards restarting and sustaining the domestic production of radioisotope thermoelectric generator material for deep space and other science and exploration missions. Funds authorized by this Act for NASA shall be made available under a reimbursable agreement with the Department of Energy for the purpose of reestablishing facilities to produce fuel required for radioisotope thermoelectric generators to enable future missions.

TITLE XI—RE-SCOPING AND REVITALIZING INSTITUTIONAL CAPABILITIES

SEC. 1101. SENSE OF CONGRESS.

It is the sense of Congress that NASA needs to re-scope, and as appropriate, down-size, to fit current and future missions and expected funding levels. Eighty percent of NASA’s facilities are over 40 years old. Additionally, in a number of areas NASA finds itself “holding onto” facilities and capabilities scaled to another era.

SEC. 1102. INSTITUTIONAL REQUIREMENTS STUDY.

Within 1 year after the date of enactment of this Act, the Administrator shall provide to the appropriate committees of Congress a comprehensive study that, taking into account the long term direction provided by this Act, carefully examines NASA’s structure, organization, and institutional assets and identifies a strategy to evolve toward the most efficient retention, sizing, and distribution of facilities, laboratories, test capabilities, and other infrastructure consistent with NASA’s missions and mandates. The Administrator should pay particular attention to identifying and removing unneeded or duplicative infrastructure. The Administrator should include in the study a suggested reconfiguration and reinvestment strategy that would conform the needed equipment, facilities, test equipment, and related organizational alignment that would best meet the requirements of missions and priorities authorized and directed by this Act. As part of this strategy, the Administrator should include consideration and application of the findings and recommendations of the National Research Council report, Capabilities for the Future: An Assessment of NASA Laboratories for Basic Research, prepared in response to section 1003 of the National Aeronautics and Space Administration Authorization Act of 2008 (42 U.S.C. 17812).

Public Law 111–273
111th Congress

An Act

Oct. 12, 2010
[S. 3397]

To amend the Controlled Substances Act to provide for take-back disposal of controlled substances in certain instances, and for other purposes.

Secure and
Responsible Drug
Disposal Act of
2010.
21 USC 801 note.

*Be it enacted by the Senate and House of Representatives of
the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the “Secure and Responsible Drug Disposal Act of 2010”.

21 USC 822 note.

SEC. 2. FINDINGS.

Congress finds the following:

(1) The nonmedical use of prescription drugs is a growing problem in the United States, particularly among teenagers.

(2) According to the Department of Justice’s 2009 National Prescription Drug Threat Assessment—

(A) the number of deaths and treatment admissions for controlled prescription drugs (CPDs) has increased significantly in recent years;

(B) unintentional overdose deaths involving prescription opioids, for example, increased 114 percent from 2001 to 2005, and the number of treatment admissions for prescription opioids increased 74 percent from 2002 to 2006; and

(C) violent crime and property crime associated with abuse and diversion of CPDs has increased in all regions of the United States over the past 5 years.

(3) According to the Office of National Drug Control Policy’s 2008 Report “Prescription for Danger”, prescription drug abuse is especially on the rise for teens—

(A) one-third of all new abusers of prescription drugs in 2006 were 12- to 17-year-olds;

(B) teens abuse prescription drugs more than any illicit drug except marijuana—more than cocaine, heroin, and methamphetamine combined; and

(C) responsible adults are in a unique position to reduce teen access to prescription drugs because the drugs often are found in the home.

(4)(A) Many State and local law enforcement agencies have established drug disposal programs (often called “take-back” programs) to facilitate the collection and destruction of unused, unwanted, or expired medications. These programs help get outdated or unused medications off household shelves and out of the reach of children and teenagers.

(B) However, take-back programs often cannot dispose of the most dangerous pharmaceutical drugs—controlled substance medications—because Federal law does not permit take-back programs to accept controlled substances unless they get specific permission from the Drug Enforcement Administration and arrange for full-time law enforcement officers to receive the controlled substances directly from the member of the public who seeks to dispose of them.

(C) Individuals seeking to reduce the amount of unwanted controlled substances in their household consequently have few disposal options beyond discarding or flushing the substances, which may not be appropriate means of disposing of the substances. Drug take-back programs are also a convenient and effective means for individuals in various communities to reduce the introduction of some potentially harmful substances into the environment, particularly into water.

(D) Long-term care facilities face a distinct set of obstacles to the safe disposal of controlled substances due to the increased volume of controlled substances they handle.

(5) This Act gives the Attorney General authority to promulgate new regulations, within the framework of the Controlled Substances Act, that will allow patients to deliver unused pharmaceutical controlled substances to appropriate entities for disposal in a safe and effective manner consistent with effective controls against diversion.

(6) The goal of this Act is to encourage the Attorney General to set controlled substance diversion prevention parameters that will allow public and private entities to develop a variety of methods of collection and disposal of controlled substances, including some pharmaceuticals, in a secure, convenient, and responsible manner. This will also serve to reduce instances of diversion and introduction of some potentially harmful substances into the environment.

SEC. 3. DELIVERY OF CONTROLLED SUBSTANCES BY ULTIMATE USERS FOR DISPOSAL.

(a) **REGULATORY AUTHORITY.**—Section 302 of the Controlled Substances Act (21 U.S.C. 822) is amended by adding at the end the following:

“(g)(1) An ultimate user who has lawfully obtained a controlled substance in accordance with this title may, without being registered, deliver the controlled substance to another person for the purpose of disposal of the controlled substance if—

“(A) the person receiving the controlled substance is authorized under this title to engage in such activity; and

“(B) the disposal takes place in accordance with regulations issued by the Attorney General to prevent diversion of controlled substances.

Regulations.

“(2) In developing regulations under this subsection, the Attorney General shall take into consideration the public health and safety, as well as the ease and cost of program implementation and participation by various communities. Such regulations may not require any entity to establish or operate a delivery or disposal program.

“(3) The Attorney General may, by regulation, authorize long-term care facilities, as defined by the Attorney General by regulation, to dispose of controlled substances on behalf of ultimate users

who reside, or have resided, at such long-term care facilities in a manner that the Attorney General determines will provide effective controls against diversion and be consistent with the public health and safety.

“(4) If a person dies while lawfully in possession of a controlled substance for personal use, any person lawfully entitled to dispose of the decedent’s property may deliver the controlled substance to another person for the purpose of disposal under the same conditions as provided in paragraph (1) for an ultimate user.”.

(b) CONFORMING AMENDMENT.—Section 308(b) of the Controlled Substances Act (21 U.S.C. 828(b)) is amended—

(1) by striking the period at the end of paragraph (2) and inserting “; or”; and

(2) by adding at the end the following:

“(3) the delivery of such a substance for the purpose of disposal by an ultimate user, long-term care facility, or other person acting in accordance with section 302(g).”.

28 USC 994.

SEC. 4. DIRECTIVE TO THE UNITED STATES SENTENCING COMMISSION.

Pursuant to its authority under section 994 of title 28, United States Code, the United States Sentencing Commission shall review and, if appropriate, amend the Federal sentencing guidelines and policy statements to ensure that the guidelines and policy statements provide an appropriate penalty increase of up to 2 offense levels above the sentence otherwise applicable in Part D of the Guidelines Manual if a person is convicted of a drug offense resulting from the authorization of that person to receive scheduled substances from an ultimate user or long-term care facility as set forth in the amendments made by section 3.
